

CLEAR-COM ARCADIA — SYSTEM MAP BY SPACE

Hormel · Stephenson · Shared/Unlabeled — as-configured roles, per the 2025-12-05 / 2026-07-07 exports

Clear-Com Arcadia Central Station

"Neptune" system — shared, one physical unit for both venues

ASW-1003 (Comms root switch) — port 1 = LAN1, port 11 = LAN2 (both legs, same switch)

VLAN 16 HelixNet/FreeSpeak · VLAN 17 ClearCom AES67

Web/CCM interface for programming: 10.18.16.30

Note

- Owner IDs cluster near Hormel entries but venue is not confirmed for these 10 roles.

* Not cleanly confirmed live in the 2026-07-07 export due to a parsing-corruption issue — see Clear-Com Arcadia Station Roster (Wiki) before treating as gone.

Labels are per-show role assignments, not fixed hardware names — the same physical beltpack/panel gets relabeled for each production. This map reflects roles as-configured, not a hardware inventory.

For physical gear counts/condition, see Audio Inventory. For the network path/VLANs, see Cisco Switch Configs and Audio Network — Current Device Register.

Note	Owner IDs cluster near Hormel entries in the export but venue isn't confirmed — possibly spare/generic roles, test packs, or a naming pass that predates the H-/S- convention.

* Live/deleted status not cleanly confirmed in the 2026-07-07 export (LevelDB parsing-corruption issue) — see Clear-Com Arcadia Station Roster (Wiki) for detail.
